

EMC Group Limited has been providing professional design and consulting services in engineering, planning, and project management to the private and public sectors since 1981.

We are currently looking to add to our established core of Professional Engineers, Planners and Civil Engineering Technicians/Technologists, the following position:

## **Civil Engineering Technologist**

### **Responsibilities**

Reporting to the Manager of our Engineering & Design Department, you will be responsible for the following:

- provide design & CAD drafting assistance to engineering staff as it relates to sewer, watermain, roadway, site servicing, grading, & stormwater management design utilizing AutoDesk Land Desktop software
- preparation of stormwater management reports
- provide surveying support as required in conjunction with the preparation of as-constructed drawings
- conduct site inspections, and preparation of the related inspection reports

### **Qualifications**

The qualified candidate possesses a diploma in civil engineering technology at an accredited institution, has a minimum of 3 years design & drafting experience in sewer, watermain and roadway design, and is a current member of OACETT. The successful candidate will also have the following:

- a sound knowledge AutoCad Land Desktop
- ability to prioritize multiple responsibilities
- superior oral and written communication skills
- a detailed knowledge of relevant design standards
- proficiency in Word, Excel & Lotus 1-2-3

### **Applications**

Qualified candidates are invited to submit their resumes by email to: [careers@emcgroup.ca](mailto:careers@emcgroup.ca)  
Please indicate in the subject line: "Application for Employment - Civil Engineering Technologist"
